**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/595,531	<b>Applicant(s)</b> GRABER ET AL.	
	<b>Examiner</b> Eric S. McCall	<b>Art Unit</b> 2855	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **BALL AND SOCKET JOINT FOR A MOTOR VEHICLE**

### **FIRST OFFICE ACTION**

#### **SPECIFICATION**

The specification is objected to because the continuing data contained in the first paragraph of page 1 is incomplete.

#### **DRAWINGS**

The drawings are objected to because the blocks in the block diagrams of Figures 3-5 are not labeled.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure

must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the Examiner, the Applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### **CLAIMS**

#### **35 U.S.C. § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(c) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 10, and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Heidemann (2003/0070476).

With respect to claims 1-3, 10, and 11, Heidemann suggests a ball and socket joint for a motor vehicle, the ball and socket joint comprising:

a housing (1) having a recess;

a ball pivot which has a pin (2) and a joint ball (8), which is mounted with said joint ball rotatably and pivotably in said recess of said housing, whereby said pin extends out through an opening provided in said housing;

a sealing bellows (10) arranged between said housing and said pin; and

a multipart measuring array, which has a signal transmitter and a sensor, said measuring array being arranged between a pin-side end of said joint ball and a pin-side end of said sealing bellows (Fig. 2B and page 2, paragraph 16).

Allowable Subject Matter

Claims 4-9 and 12-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims because the prior art fails to teach or suggest the claimed subject matter of the respective claims. Since each of the claims are brief, no further explanation is deemed necessary as to the limitations not taught by the prior art.

**CITED DOCUMENTS**

The Applicant's attention is directed to the enclosed "PTO-892" form for the prior art made of record at the time of this office action.
